**COMMITMENT**  
YOU CAN COUNT ON

CMC was approved to ship for zinc reclamation to Zinc Nacional 5,000 tons for the period of October 1, 2014 to September 30, 2015. During calendar year 2015, CMC did not export K016 EAF Dust to Zinc Nacional in Monterrey, Mexico.

- 5i. A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated.

The volume of K061 produced is dependent on the volume of steel produced. Annual melt shop steel production and K061 generation in 2015 was less than the 2014 production year.

Calendar Year	K061 Generated
2013	8,114 tons
2014	8,870 tons
2015	7,403 tons

CMC exports/ships this material to Zinc Nacional or other zinc reclamation facilities for the sole purpose of reclamation of the zinc metals contained therein. Its contract with Zinc Nacional requires a minimum of 15% zinc. Zinc Nacional recovers the metal for use in pigments, medicines, and other commercial and industrial uses. The residues from the processing are non-hazardous. Therefore, after reclamation by Zinc Nacional, the hazardous waste volume is reduced to zero and the toxicity of all solid waste by products is zero.

- 5ii. A description of changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for years prior to 1984.

There was an decrease in the volume of EAF Dust generated in comparison to calendar years 2014. There was no change in toxicity of waste generated by CMC during 2015.
